STATINTL

Gentlemen:

Attention:

We have received good reports on your new photographic rectifier which you exhibited during November at your headquarters. We regret that we were unable to send a representative.

STATINTL

We are interested in this equipment, as we are in all interesting new developments in photography or photogrammetry, and would like to have more information. Can you furnish us any printed matter that would heighten our understanding? We would appreciate anything you could send us.

Is it intended to exhibit the instrument at the ACEM-ASP Meetings in March? If so, we will look forward to viewing it then.

Very truly yours,

STATINTL
